SUBJECT INDEX, 1983

***Ab Initio* Studies**
Hydrogen-bond Energies of the FHF^- and $HHOHF^-$. *Ab Initio* Studies of Strong Hydrogen Bonds Involving Fluoride, Using Improved Fluoride Energies, 1347–1353

Absorption
Absorption and Magnetic Circular Dichroism Spectra of Some of $f \rightarrow d$ Transitions in Ce^{3+}: $Na_3Y(C_4H_4O_5)_3 \cdot 2NaClO_4 \cdot 6H_2O$, 755–760
Absorption Spectra of Substituted Biphenyl and Related Cations in Solid Argon and a Comparison with Photoelectron Spectra, 885–895
Absorption Spectrum of the Carbon Tetrachloride Molecular Cation in Noble-gas Matrices, 1417–1424
Low-Temperature Absorption Spectrum of the Nickel(II) Ion in Single Crystals of the Columbite $NiNb_2O_6$, 847–863

Acetamide
Viscoelastic Relaxation in the Acetamide + Sodium Thiocyanate Binary System, 1257–1263

Acetone
Computer Simulation of Some Spectral Properties of Liquid Acetone, 153–165

Acetylcholine Halides
Effect of Methyl-group Reorientation and Spin Diffusion on Spin–Lattice Relaxation in Some Choline and Acetylcholine Halides, 1107–1112

Alcohols
Structure and Dipole Relaxation Machanisms in the Cyclic Alcohols Cyclopentanol to Cyclo-octanol, 369–417

Alkali-metal Halide
Structure and Energetics of Alkali-metal Halide Dimer Molecules, 663–675

Alkylammonium Carboxylate
Dielectric Study of Relaxation in Anionic Alkylammonium Carboxylate Surfactants and Related Non-ionic Molecules, 1217–1231

1-Aminonaphthalenes
Photophysics of 1-Aminonaphthalenes, 1563–1584

Ammonium Tri-iodide
Positive Temperature Coefficient of the Iodine Quadrupole Resonance Frequency in Ammonium Tri-iodide due to Reorientation of the Ammonium Ion, 497–504

Anthracene
Radiationless Transitions in *p*-Terphenyl Crystals Doped with Anthracene, Tetracene and Pentacene, 263–269

Argon
Absorption Spectra of Substituted Biphenyl and Related Cations in Solid Argon and a Comparison with Photoelectron Spectra, 885–895

Argon-ion Bombardment
X-Ray Photoelectron Spectroscopic Studies of Unsupported and Supported Rhenium using Argon-ion Bombardment, 1719–1728

Azulenothiophenes
Magnetic Circular Dichroism and Anomalous Fluorescence Spectra of Azulenothiophenes, 1155–1163

$BaPt(CN)_4 \cdot H_2O$
Temperature Dependence of Emission Spectra and Excited-state Lifetimes in Pure and Nickel-doped One-dimensional $BaPt(CN)_4 \cdot H_2O$, 65–76

Benzene
Molecular Reorientation of Benzene in Carbon Tetrachloride, Tetramethylsilane and Neopentane Solutions, 1143–1153

Benzenoid Hydrocarbons
Characteristic and Matching Polynomials of Benzenoid Hydrocarbons, 337–345

Benzophenone
Intramolecular Relaxation Processes of Benzophenone and Related Molecules in Glassy Media, 559–570

Benzo-1,4-quinone
Photoreduction of Benzo-1,4-quinone Sensitized by Metalloporphyrins, 807–816

Bimorphic Lattice Theory
Bimorphic Lattice Theory of Electrolyte Solutions. Analysis of Conductivity Data, 1607–1611

Binary Mixtures
Phase Equilibria in Binary Mixtures. Part 1.—Miscibility Gap with Upper or Lower Critical Point, 41–55
Phase Equilibria in Binary Mixtures. Part 2.—Miscibility Gap with Two Critical Temperatures (Closed-loop Phase Diagram), 57–64

Biot Number
Surface Temperature Gradients and Rates of Internal Heat Evolution at Criticality for Generalized Heat Transfer (Arbitrary Biot Number), 1629–1631

Biphenyl
Absorption Spectra of Substituted Biphenyl and Related Cations in Solid Argon and a Comparison with Photoelectron Spectra, 885–895

Biphenylene
Electronic Spectra of Biphenylene and

Biphenylene (*cont.*)
Diazabiphenylenes, 599–609
Bipyridines
Electronic Structure and Low-energy Photoelectron Spectra of 4,4′-Disubstituted 2,2′-Bipyridines, 295–301
Birefringence
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane, 539–545
Bond-orbital Analysis
A Bond-orbital Analysis of the Rotational Barrier in Borazane and its Comparison with Ethane, 931–939
Bond-orbital Calculations
Improved Bond-orbital Calculations of Rotational Barriers in Molecules Containing Lone Pairs of Electrons, 1283–1298
Bonds
Infrared Intensities and the Polar Properties of Bonds, 745–754
Borazane
A Bond-orbital Analysis of the Rotational Barrier in Borazane and its Comparison with Ethane, 931–939
Bromoform
Far-infrared and Computers Simulation Analysis of Liquid and Rotator-phase Bromoform, 137–151
t-Butyl Chloride
Computer Simulation of some Structural and Spectral Properties of Liquid and Rotator Phase t-Butyl Chloride, 767–783
$Ca(4\,^3P_J)$
Kinetic Study of $Ca(4\,^3P_J)$ by Time-resolved Emission, $4\,^3P_1 \rightarrow 4\,^1S_0 + h\nu$ ($\lambda = 657.3$ nm), following Dye-laser Excitation. Spontaneous Emission, Diffusion and Collisional Quenching, 1265–1281
Carbon Tetrachloride
Molecular Reorientation of Benzene in Carbon Tetrachloride, Tetramethylsilane and Neopentane Solutions, 1143–1153
Absorption Spectrum of the Carbon Tetrachloride Molecular Cation in Noble-gas Matrices, 1417–1424
CD_3I
Photofragmentation of CH_3I, CD_3I and CF_3I. Formation of $I(^2P_{1/2})$ as Function of Wavelength, 303–316
Ce^{3+}
Absorption and Magnetic Circular Dichroism Spectra of Some of $f \rightarrow d$ Transitions in Ce^{3+}: $Na_3Y(C_4H_4O_5)_3 \cdot 2NaClO_4 \cdot 6H_2O$, 755–760
CF_3I
Photofragmentation of CH_3I, CD_3I and CF_3I. Formation of $I(^2P_{1/2})$ as Function of Wavelength, 303–316
Charge-transfer State
Solute–Solvent Exciplex *versus* Twisted Intramolecular Charge-transfer State in Anomalous Fluorescence of 4-*nn*-Dimethylaminobenzonitrile, 347–367
Chelate Complexes
Excited States of Mixed-ligand Chelate Complexes of Ruthenium (II). A Re-examination of the Evidence for Strong Interligand Coupling, 195–210
Chemical and Radiation Potential
Transfer and Storage of Chemical and Radiation Potential, 473–482
Chemiluminescence
Visible Chemiluminescence from the High-pressure Reactions of F atoms with CH_3I and CH_2I_2, 1113–1121
CH_3I
Photofragmentation of CH_3I, CD_3I and CF_3I. Formation of $I(^2P_{1/2})$ as Function of Wavelength, 303–316
2-Chlorodibenzo-*p*-dioxine
^{13}C Nuclear Magnetic Resonance Spin–Lattice Relaxation Times and Conformation of 2-Chlorodibenzo-*p*-dioxine, 1633–1638
Choline
Effect of Methyl-group Reorientation and Spin Diffusion on Spin–Lattice Relaxation in Some Choline and Acetylcholine Halides, 1107–1112
Circular Dichroism Spectra
Electronic and Matrix Circular Dichroism Spectra of Matrix-isolated Nickel Atoms, 1011–1020
CO
Optical Properties of Microcrystalline Zinc Oxide. Influence of Defects Produced by Interaction with CO, 1779–1789
$Co(en)_2^{2+}$
Preparation, Spectroscopy and Reaction with Oxygen of $Co(en)_2^{2+}$ on the Surface of Hectorite, 1169–1180
Collective Modes
Collective Modes in Nematic Liquid Crystals, 833–845
Collisional Quenching
Collisional Quenching of $Ca(4\,^3P_J)$ Studied by Time-resolved Emission, $4\,^3P_1 \rightarrow 4\,^1S_0 + h\nu$ (=657.3 nm), following Dye-laser Excitation, 1677–1687
Colloidal Dispersions
Small-angle Scattering from Colloidal Dispersions, 817–832
Colloidal Particles
Motion of Flocs of Two or Three Interacting Colloidal Particles in a Hydrodynamic Medium, 91–109
Approximate Analytic Expressions for the Electrophoretic Mobility of Spherical Colloidal Particles and the Conductivity of their Dilute Suspensions, 1613–1628
Columbite
Low-Temperature Absorption Spectrum of the

Columbite (*cont.*)
Nickel(II) Ion in Single Crystals of the Columbite $NiNb_2O_6$, 847–863
Compliant Fields
Compliant Fields for Formic Acid and Formamide, 1699–1706
Computer Simulation
Computer Simulation of Some Spectral Properties of Liquid Acetone, 153–165
Molecular Dynamics of Liquid and Supercooled Ethyl Chloride. A Computer Simulation, 719–730
Computer Simulation of some Structural and Spectral Properties of Liquid and Rotator Phase t-Butyl Chloride, 767–783
Computer Simulation of the Dynamics of Optically Active Molecules in the Liquid State, 1331–1340
Computer Simulation of the Statistical Correlation between Rotation and Translation in 3-Methylcylohexane, 1473–1479
Computer Simulation of Water in contact with a Rigid-ion Crystal Surface, 1639–1651
Far-infrared and Computer Simulation Analysis of Liquid and Rotator-phase Bromoform, 137–151
Conductivity
Prototropic Charge Migration in Water. Part 2.—Interpretation of Nuclear Magnetic Resonance and Conductivity Data in Terms of Model Mechanisms, 1047–1073
Approximate Analytic Expressions for the Electrophoretic Mobility of Spherical Colloidal Particles and the Conductivity of their Dilute Suspensions, 1613–1628
Bimorphic Lattice Theory of Electrolyte Solutions. Analysis of Conductivity Data, 1607–1611
Cooperative Behaviour
Cooperative Behaviour in Liquids, 547–558
Copper(II)
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
CrO
A Study of the First Ionization Potential of the CrO($X\ ^5\Pi$) Molecule with High-temperature Photoelectron Spectroscopy, 1083–1088
Crystal Growth
Influence of Electrical Fields on the Nucleation of Crystal Growth in Some Cycloalcohols, 1443–1453
Crystal Surface
Computer Simulation of Water in contact with a Rigid-ion Crystal Surface, 1639–1651
Cycloalcohols
Influence of Electrical Fields on the Nucleation of Crystal Growth in Some
Cycloalcohols (*cont.*)
Cycloalcohols, 1443–1453
Cyclohexane
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane, 539–545
Cyclo-octanol
Structure and Dipole Relaxation Machanisms in the Cyclic Alcohols Cyclopentanol to Cyclo-octanol, 369–417
Cyclopentanol
Structure and Dipole Relaxation Machanisms in the Cyclic Alcohols Cyclopentanol to Cyclo-octanol, 369–417
Debye Screening
Non-local Dielectric Response of a Polar Solvent and Debye Screening in Ionic Solution, 651–661
Deoxyribonucleic Acid
Dynamics of the Degradation of Tritium-substituted Deoxyribonucleic Acid in Aqueous Solution from Dielectric Relaxation and Viscosity Measurements, 897–905
Dextran
Ultrasonic Relaxation of Poly(*N*-vinylpyrrolidone) and Dextran in Aqueous Solution, 977–988
Diamines
Intramolecular $NH\cdots N^- \rightleftharpoons {}^-N\cdots HN$ Hydrogen Bonds with Large Proton Polarizability in Monosalts of Diamines, 1249–1255
Diatomic Potentials
Ground-state Diatomic Potentials, 323–328
Diazabiphenylenes
Electronic Spectra of Biphenylene and Diazabiphenylenes, 599–609
Dielectric
Fast Response of a Dielectric to the Motion of a Charge, 1465–1467
Dielectric Dispersion
Dielectric Dispersion Studies of Some Unsaturated Compounds in Dilute Solutions, 9–17
Dielectric Relaxation
Dynamics of the Degradation of Tritium-substituted Deoxyribonucleic Acid in Aqueous Solution from Dielectric Relaxation and Viscosity Measurements, 897–905
Dielectric Response
Non-local Dielectric Response of a Polar Solvent and Debye Screening in Ionic Solution, 651–661
Dielectric Study
Dielectric Study of Relaxation in Anionic Alkylammonium Carboxylate Surfactants and Related Non-ionic Molecules, 1217–1231

Difluoro(trifluorosilyl) borane
Microwave Spectrum and Structure of Difluoro(trifluorosilyl) borane, SiF_3BF_2, 1089–1106
Diffusion Kinetics
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 1.—Sorption Kinetics, 571–584
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 2.—Permeation Kinetics, 585–597
Dilute Solutions
Dielectric Dispersion Studies of Some Unsaturated Compounds in Dilute Solutions, 9–17
Dilute Suspensions
Approximate Analytic Expressions for the Electrophoretic Mobility of Spherical Colloidal Particles and the Conductivity of their Dilute Suspensions, 1613–1628
Dimethylaminobenzonitrile
Solute–Solvent Exciplex *versus* Twisted Intramolecular Charge-transfer State in Anomalous Fluorescence of 4-*NN*-Dimethylaminobenzonitrile, 347–367
Diphenyl-1,3,5-hexatriene
Photophysics of Derivatives of all-*trans*-1,6-Diphenyl-1,3,5-hexatriene (DPH) Part 1.—Model Involving Fluorescence from S_2 and S_1 Excited States, 433–447
Dipole Relaxation Mechanisms
Structure and Dipole Relaxation Mechanisms in the Cyclic Alcohols Cyclopentanol to Cyclo-octanol, 369–417
Drop of Liquid
The Surface Tension of a Drop of Liquid, 1689–1698
Dye-laser Excitation
Collisional Quenching of $Mg(3\,^3P_J)$ Studied by Time-resolved Emission, $3\,^3P_1 \rightarrow 3\,^1S_0 + h\nu$ ($\lambda = 457.1$ nm), followed by Dye-laser Excitation, 919–930
Kinetic Study of $Ca(4\,^3P_J)$ by Time-resolved Emission, $4\,^3P_1 \rightarrow 4\,^1S_0 + h\nu$ ($\lambda = 657.3$ nm), following Dye-laser Excitation. Spontaneous Emission, Diffusion and Collisional Quenching, 1265–1281
Collisional Quenching of $Ca(4\,^3P_J)$ Studied by Time-resolved Emission, $4\,^3P_1 \rightarrow 4\,^1S_0 + h\nu$ (=657.3 nm), following Dye-laser Excitation, 1677–1687
Dynamics
Dynamics of the Degradation of Tritium-substituted Deoxyribonucleic Acid in Aqueous Solution from Dielectric Relaxation and Viscosity Measurements, 897–905
Computer Simulation of the Dynamics of Optically Active Molecules in the Liquid State, 1331–1340
Electric Double Layer
Spatially Varying Polarization in Ice. A Model for the Electric Double Layer and the Hydration Force, 225–242
Comments on the Modified Poisson–Boltzmann Theory for the Electric Double Layer, 1315–1317
Electrical Fields
Influence of Electrical Fields on the Nucleation of Crystal Growth in Some Cycloalcohols, 1443–1453
Electric-double-layer Theory
An Improved Modified Poisson–Boltzmann Equation in Electric-double-layer Theory, 707–718
Electrohydrodynamic Stability
Electrohydrodynamic Stability of Unsymmetrical Aqueous Films. Application to Membrane–Membrane Interactions, 961–976
Electrolyte Solutions
Bimorphic Lattice Theory of Electrolyte Solutions. Analysis of Conductivity Data, 1607–1611
Electron Spin Resonance
Solution Electron Spin Resonance Linewidths of a Molybdenum Complex, 167–174
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Electron Spin Resonance Study of Spin Exchange in a Nematic Solvent, 1243–1247
Electron Transfer
Electron Transfer in Proteins, 1375–1388
Electronic
Electronic and Matrix Circular Dichroism Spectra of Matrix-isolated Nickel Atoms, 1011–1020
Vibrational and Electronic Spectra of $Na[UO_2(CH_3COO)_3]$, 317–321
Electronic Spectra of Biphenylene and Diazabiphenylenes, 599–609
Ion-cluster Formation and its Effect on the Electronic Spectrum of Radical-ion Pairs, 1233–1241
Electronic Structure
Electronic Structure and Low-energy Photoelectron Spectra of 4,4′-Disubstituted 2,2′-Bipyridines, 295–301
Electron-impact Spectroscopy
Energetics of the Ionization and Fragmentation of Phosphorus Oxyfluoride Studied by Electron-impact Spectroscopy, 1341–1346
Electrophoretic Mobility
Approximate Analytic Expressions for the Electrophoretic Mobility of Spherical Colloidal Particles and the Conductivity of their Dilute Suspensions, 1613–1628

Electrostatic Molecular Potentials
An Analytic Method for the Calculation of Electrostatic Molecular Potentials, 1389–1398
Elementary Reactions
Elementary Reactions of the NCl Radical. Part 1.—Rate Constants for the Reactions $NCl + NCl \rightleftharpoons N_2 + 2Cl$ and $O + NCl \rightleftharpoons NO + Cl$, 283–293
Emission Spectra
Temperature Dependence of Emission Spectra and Excited-state Lifetimes in Pure and Nickel-doped One-dimensional $BaPt(CN)_4 \cdot H_2O$, 65–76
Enantiomers
Enantiomers and Racemic Mixtures. The Correlation between Rotation and Translation, 1811–1815
Energetics
Energetics of the Ionization and Fragmentation of Phosphorus Oxyfluoride Studied by Electron-impact Spectroscopy, 1341–1346
Environmental Effects
An Improved Quantum-mechanical Study of Environmental Effects on the Spectral Shift of the Rhodopsin System, 1759–1770
Ethane
A Bond-orbital Analysis of the Rotational Barrier in Borazane and its Comparison with Ethane, 931–939
Thermodynamics of Liquid Mixtures of Nitrous Oxide and Ethane, 1399–1415
Ethyl Chloride
Molecular Dynamics of Liquid and Supercooled Ethyl Chloride. A Computer Simulation, 719–730
Eu^{3+}
Luminescence of Eu^{3+} and Tb^{3+} Ions Adsorbed on Hydrated Layer-lattice Silicate Surfaces, 505–518
Evolution of Hydrogen
Photochemistry and Sensitized Evolution of Hydrogen from Water Using Water-soluble Cationic Porphyrins. Tetrakis(trimethylaminophenyl)-porphyrinatozinc and its Free Base, 1365–1374
Excited States
Excited States of Mixed-ligand Chelate Complexes of Ruthenium (II). A Re-examination of the Evidence for Strong Interligand Coupling, 195–210
Excited-state Lifetimes
Temperature Dependence of Emission Spectra and Excited-state Lifetimes in Pure and Nickel-doped One-dimensional $BaPt(CN)_4 \cdot H_2O$, 65–76
Explosion
Thermal Explosion, Times to Ignition and Near-critical Behaviour in Uniform-temperature Systems. Part 2.—Generalized Dependences of Rates on Temperature and
Explosion (*cont.*)
Concentration, 1299–1313
***S*-Exponential Sum Method**
Analysis of Proton Correlation Spectral Decay Curves by the *S*-exponential Sum Method, 989–1009
Extended X-ray Absorption Fine Structure Study
Reduced Forms of $LaNiO_3$ Perovskite. Part 2.—X-ray Structure of $LaNiO_2$ and Extended X-ray Absorption Fine Structure Study: Local Environment of Monovalent Nickel, 1195–1203
Far-infrared
Far-infrared and Computer Simulation Analysis of Liquid and Rotator-phase Bromoform, 137–151
Fast Processes
A Semi-linear Optimization Model for Resolving Fast Processes, 123–135
FeSn
Mössbauer Studies of FeSn Molecules Isolated in Rare-gas Solids and SCF–Xα–Scattered-wave Molecular-orbital Analyses of Sn_2 and FeSn Diatomic Molecules, 271–282
Films
Electrohydrodynamic Stability of Unsymmetrical Aqueous Films. Application to Membrane–Membrane Interactions, 961–976
Flocs
Motion of Flocs of Two or Three Interacting Colloidal Particles in a Hydrodynamic Medium, 91–109
Fluorescence
Magnetic Circular Dichroism and Anomalous Fluorescence Spectra of Azulenothiophenes, 1155–1163
Solute–Solvent Exciplex *versus* Twisted Intramolecular Charge-transfer State in Anomalous Fluorescence of 4-*nn*-Dimethylaminobenzonitrile, 347–367
Photophysics of Derivatives of all-*trans*-1,6-Diphenyl-1,3,5-hexatriene (DPH) Part 1.—Model Involving Fluorescence from S_2 and S_1 Excited States, 433–447
NO Fluorescence During Vacuum-ultraviolet Photodissociation of $CFCl_2NO$, 1355–1363
Fluoride
Hydrogen-bond Energies of the FHF^- and $HOHF^-$. *Ab Initio* Studies of Strong Hydrogen Bonds Involving Fluoride, Using Improved Fluoride Energies, 1347–1353
Fluorobenzene
Molecular Quadrupole Moment and Effective-quadrupole-Centre of Fluorobenzene, 529–538
Formamide
Compliant Fields for Formic Acid and Formamide, 1699–1706
Formic Acid
Compliant Fields for Formic Acid and Formamide, 1699–1706

N-Formylmorpholine
Ultrasonic Studies of *N*-Formylmorpholine + Water Mixtures, 449–461
Fragmentation
Energetics of the Ionization and Fragmentation of Phosphorus Oxyfluoride Studied by Electron-impact Spectroscopy, 1341–1346
Furan,
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane, 539–545
Gas-phase Reactions
Kinetics of the Gas-phase Reactions of OH with NO_2 and with NO, 111–122
Glassy Media
Intramolecular Relaxation Processes of Benzophenone and Related Molecules in Glassy Media, 559–570
Heat Evolution
Surface Temperature Gradients and Rates of Internal Heat Evolution at Criticality for Generalized Heat Transfer (Arbitrary Biot Number), 1629–1631
Heat Transfer
Surface Temperature Gradients and Rates of Internal Heat Evolution at Criticality for Generalized Heat Transfer (Arbitrary Biot Number), 1629–1631
Heat-capacity Measurements
Polymorphism in $(n\text{-}C_7H_{15}NH_3)_2MnCl_4$ and $(n\text{-}C_7H_{15}NH_3)_2CdCl_4$ as determined by Heat-capacity Measurements from 10 to 325 K, 1653–1661
Heat-transfer Coefficient
Thermal Explosions, Criticality and Transition in Systems with Variable Heat-transfer Coefficient. Uniform Temperatures (Semenov Case), 1481–1498
Hectorite
Preparation, Spectroscopy and Reaction with Oxygen of $CO(en)_2^{2+}$ on the Surface of Hectorite, 1169–1180
High Pressures
Spectroscopy at High Pressures. Part 42.—The Raman Spectrum of Mercury(II) Thiocyanate, 695–705
Hydrogen
Inelastic Neutron Scattering Study of Hydrogen Adsorbed on Impure Palladium Black, 253–262
Hydrogen Bonding
Infrared Spectroscopic Studies of Hydrogen Bonding in Triethylammonium Salts. Part 2.—Association of Triethylammonium Salts with Bases, 951–960
Hydrogen Bonds
Intramolecular $NH\cdots N^- \rightleftharpoons {}^-N\cdots HN$ Hydrogen Bonds with Large Proton Polarizability in Monosalts of Diamines, 1249–1255
Hydrogen-bond Energies
Hydrogen-bond Energies of the FHF^- and $HOHF^-$. *Ab Initio* Studies of Strong Hydrogen Bonds Involving Fluoride, Using Improved Fluoride Energies, 1347–1353
Ice
Spatially Varying Polarization in Ice, 211–223
Spatially Varying Polarization in Ice. A Model for the Electric Double Layer and the Hydration Force, 225–242
Ignition
Thermal Explosion, Times to Ignition and Near-critical Behaviour in Uniform-temperature Systems. Part 2.—Generalized Dependences of Rates on Temperature and Concentration, 1299–1313
Image-charge Forces
Image-charge Forces in Phospholipid Bilayer Systems, 19–35
Infrared
Infrared Intensities and the Polar Properties of Bonds, 745–754
Infrared Spectroscopic Studies of Hydrogen Bonding in Triethylammonium Salts. Part 2.—Association of Triethylammonium Salts with Bases, 951–960
Interligand Coupling
Excited States of Mixed-ligand Chelate Complexes of Ruthenium (II). A Re-examination of the Evidence for Strong Interligand Coupling, 195–210
Iodine
Positive Temperature Coefficient of the Iodine Quadrupole Resonance Frequency in Ammonium Tri-iodide due to Reorientation of the Ammonium Ion, 497–504
Ion Exchange
Ternary Ion Exchange. Part 4.—Activity Corrections for the Solution Phase, 419–432
Ion-cluster Formation
Ion-cluster Formation and its Effect on the Electronic Spectrum of Radical-ion Pairs, 1233–1241
Ionization
Energetics of the Ionization and Fragmentation of Phosphorus Oxyfluoride Studied by Electron-impact Spectroscopy, 1341–1346
K_2FeF_5
d-Orbital-directed X-ray Photoemission from Some Transition-metal Fluoride Single Crystals and Associated Calculations. K_2FeF_5, 1321–1329
Kinetic Study
Kinetic Study of $Ca(4\,^3P_J)$ by Time-resolved Emission, $4\,^3P_1 \rightarrow 4\,^1S_0 + h\nu$ ($\lambda = 657.3$ nm), following Dye-laser Excitation. Spontaneous Emission, Diffusion and Collisional Quenching, 1265–1281
Kinetics
Kinetics of the Gas-phase Reactions of OH with NO_2 and with NO, 111–122

Kinetics (*cont.*)
Kinetics of Metastable Singlet NCl Radicals, 1515–1524
Lamellar Phases
One-dimensional Mathematical Treatment of Small-angle X-ray Scattering from a System of Alternating Lamellar Phases, 1593–1605
$LaNiO_2$
Reduced Forms of $LaNiO_3$ Perovskite. Part 1.—Evidence for New Phases: $La_2Ni_2O_5$ and $LaNiO_2$, 1181–1194
Reduced Forms of $LaNiO_3$ Perovskite. Part 2.—X-ray Structure of $LaNiO_2$ and Extended X-ray Absorption Fine Structure Study: Local Environment of Monovalent Nickel, 1195–1203
LCAO Functions
Point-group Symmetries on the Spherical Shell. New Perspectives in the Generation of Symmetry-adapted LCAO Functions, 1791–1808
Liquid Lens
The Thermodynamics of a Liquid Lens, 77–90
Liquid Mixtures
Thermodynamics of Liquid Mixtures of Nitrous Oxide and Ethane, 1399–1415
Liquid State
Computer Simulation of the Dynamics of Optically Active Molecules in the Liquid State, 1331–1340
Liquids
Cooperative Behaviour in Liquids, 547–558
Viscoelastic Shear Thinning of Liquids. A Molecular-dynamics Study, 611–635
Lithium Diffusion
Nuclear Magnetic Resonance Investigations of Lithium Diffusion in Li_2O, Li_2SiO_3 and $LiAlO_2$, 1205–1216
Luminescence
Luminescence of Eu^{3+} and Tb^{3+} Ions Adsorbed on Hydrated Layer-lattice Silicate Surfaces, 505–518
Magnetic Circular Dichroism
Magnetic Circular Dichroism and Anomalous Fluorescence Spectra of Azulenothiophenes, 1155–1163
Absorption and Magnetic Circular Dichroism Spectra of Some of $f \rightarrow d$ Transitions in Ce^{3+}: $Na_3Y(C_4H_4O_5)_3 \cdot 2NaClO_4 \cdot 6H_2O$, 755–760
Matching Polynomials
Characteristic and Matching Polynomials of Benzenoid Hydrocarbons, 337–345
Membrane
Electrohydrodynamic Stability of Unsymmetrical Aqueous Films. Application to Membrane–Membrane Interactions, 961–976
Memory Effects
Memory Effects in Collisional Polarizations in Polystyrene, Xylene and Polystyrene Toluene Solutions, 687–693
Mercury(II) Thiocyanate
Spectroscopy at High Pressures. Part 42.—The Raman Spectrum of Mercury(II) Thiocyanate, 695–705
Metalloporphyrins
Photoreduction of Benzo-1,4-quinone Sensitized by Metalloporphyrins, 807–816
3-Methylcylohexane
Computer Simulation of the Statistical Correlation between Rotation and Translation in 3-Methylcyclohexane, 1473–1479
Methylhexanes
Ultrasonic Studies of Rotational Isomerism in Various Methylhexanes, 731–743
Mg
Collisional Quenching of $Mg(3\,^3P_J)$ Studied by Time-resolved Emission, $3\,^3P_1 \rightarrow 3\,^1S_0 + h\nu$ ($\lambda = 457.1$ nm), followed by Dye-laser Excitation, 919–930
Microwave Spectrum
Microwave Spectrum and Structure of Difluoro(trifluorosilyl) borane, SiF_3BF_2, 1089–1106
Mode-locked Lasers
Raman Amplification Spectroscopy Using Mode-locked Lasers, 865–883
Molecular Dynamics
Molecular Dynamics of Liquid and Supercooled Ethyl Chloride. A Computer Simulation, 719–730
Molecular Orbitals
Localization of Molecular Orbitals, 37–40
Molecular Reorientation
Molecular Reorientation of Benzene in Carbon Tetrachloride, Tetramethylsilane and Neopentane Solutions, 1143–1153
Molecular-dynamics
Viscoelastic Shear Thinning of Liquids. A Molecular-dynamics Study, 611–635
Self-diffusion and Shear Viscosity of Simple Fluids. A Molecular-dynamics Study, 1741–1758
Molecular-orbital
Mössbauer Studies of FeSn Molecules Isolated in Rare-gas Solids and SCF–Xα–Scattered-wave Molecular-orbital Analyses of Sn_2 and FeSn Diatomic Molecules, 271–282
Molybdenum
Solution Electron Spin Resonance Linewidths of a Molybdenum Complex, 167–174
Mössbauer Studies
Mössbauer Studies of FeSn Molecules Isolated in Rare-gas Solids and SCF–Xα–Scattered-wave Molecular-orbital Analyses of Sn_2 and FeSn Diatomic Molecules, 271–282
Motion of a Charge
Fast Response of a Dielectric to the Motion of a Charge, 1465–1467
$Na[UO_2(CH_3COO)_3]$
Vibrational and Electronic Spectra of $Na[UO_2(CH_3COO)_3]$, 317–321

Na_3Y
Absorption and Magnetic Circular Dichroism Spectra of Some of $f \rightarrow d$ Transitions in Ce^{3+}: $Na_3Y(C_4H_4O_5)_3 \cdot 2NaClO_4 \cdot 6H_2O$, 755–760
$(n\text{-}C_7H_{15}NH_3)_2CdCl_4$
Polymorphism in $(n\text{-}C_7H_{15}NH_3)_2MnCl_4$ and $(n\text{-}C_7H_{15}NH_3)_2CdCl_4$ as determined by Heat-capacity Measurements from 10 to 325 K, 1653–1661
$(n\text{-}C_7H_{15}NH_3)_2MnCl_4$
Polymorphism in $(n\text{-}C_7H_{15}NH_3)_2MnCl_4$ and $(n\text{-}C_7H_{15}NH_3)_2CdCl_4$ as determined by Heat-capacity Measurements from 10 to 325 K, 1653–1661
NCl
Elementary Reactions of the NCl Radical. Part 1.—Rate Constants for the Reactions $NCl + NCl \rightleftharpoons N_2 + 2Cl$ and $O + NCl \rightleftharpoons NO + Cl$, 283–293
Kinetics of Metastable Singlet NCl Radicals, 1515–1524
Near-critical Behaviour
Thermal Explosion, Times to Ignition and Near-critical Behaviour in Uniform-temperature Systems. Part 2.—Generalized Dependences of Rates on Temperature and Concentration, 1299–1313
Nematic Liquid Crystals
Collective Modes in Nematic Liquid Crystals, 833–845
Nematic Solvent
Electron Spin Resonance Study of Spin Exchange in a Nematic Solvent, 1243–1247
Neopentane
Molecular Reorientation of Benzene in Carbon Tetrachloride, Tetramethylsilane and Neopentane Solutions, 1143–1153
Neutron Scattering
Incoherent Inelastic Neutron Scattering Studies of Transition-metal Hydridocarbonyls. Part 1.—$Cs^+[HCO_6(CO)_{15}]^-$, 1713–1717
Inelastic Neutron Scattering Study of Hydrogen Adsorbed on Impure Palladium Black, 253–262
Nickel
Temperature Dependence of Emission Spectra and Excited-state Lifetimes in Pure and Nickel-doped One-dimensional $BaPt(CN)_4 \cdot H_2O$, 65–76
Reduced Forms of $LaNiO_3$ Perovskite. Part 2.—X-ray Structure of $LaNiO_2$ and Extended X-ray Absorption Fine Structure Study: Local Environment of Monovalent Nickel, 1195–1203
Nickel Atoms
Electronic and Matrix Circular Dichroism Spectra of Matrix-isolated Nickel Atoms, 1011–1020
Nickel(II)
Low-Temperature Absorption Spectrum of the Nickel(II) Ion in Single Crystals of the Columbite $NiNb_2O_6$, 847–863
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Nitric Oxide
Temperature Dependence of the Rate Constants for the Quenching by Nitric Oxide of the Two Excited Singlet States of Molecular Oxygen = $O_2(a\ ^1\Delta_g)$ and $O_2(b\ ^1\Delta_g^+)$, 907–917
Nitrous Oxide
Thermodynamics of Liquid Mixtures of Nitrous Oxide and Ethane, 1399–1415
NO
Kinetics of the Gas-phase Reactions of OH with NO_2 and with NO, 111–122
NO_2
Kinetics of the Gas-phase Reactions of OH with NO_2 and with NO, 111–122
Noble-gas Matrices
Absorption Spectrum of the Carbon Tetrachloride Molecular Cation in Noble-gas Matrices, 1417–1424
Non-ionic Molecules
Dielectric Study of Relaxation in Anionic Alkylammonium Carboxylate Surfactants and Related Non-ionic Molecules, 1217–1231
Nuclear Magnetic Resonance
Nuclear Magnetic Resonance Investigations of Lithium Diffusion in Li_2O, Li_2SiO_3 and $LiAlO_2$, 1205–1216
Proton and Carbon-13 Nuclear Magnetic Resonance Spectra and INDO Study of Serotonine, Tryptamine and L-Tryptophan, 491–496
Prototropic Charge Migration in Water. Part 2.—Interpretation of Nuclear Magnetic Resonance and Conductivity Data in Terms of Model Mechanisms, 1047–1073
^{13}C Nuclear Magnetic Resonance Spin–Lattice Relaxation Times and Conformation of 2-Chlorodibenzo-*p*-dioxine, 1633–1638
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 5.—First-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1525–1538
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 6.—Second-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1539–1561
Nuclear Magnetic Resonance Spin–Lattice Relaxation Times
Evaluation of ^1H Nuclear Magnetic Resonance Spin–Lattice Relaxation Times Facilitated

NMR Spin–Lattice Relaxation Times (*cont.*)
by Analogous ^{13}C Studies, Illustrated by Studies of 1,3,5-Trimethylbenzene, 1021–1029
Nuclear Quadrupole Resonance
^{14}N Nuclear Quadrupole Resonance and Relaxation in Tetramethylpyrazine, 1771–1777
Nucleation
Influence of Electrical Fields on the Nucleation of Crystal Growth in Some Cycloalcohols, 1443–1453
OH
Kinetics of the Gas-phase Reactions of OH with NO_2 and with NO, 111–122
Optical
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Optical Properties
Optical Properties of Microcrystalline Zinc Oxide. Influence of Defects Produced by Interaction with CO, 1779–1789
Optically Active Molecules
Computer Simulation of the Dynamics of Optically Active Molecules in the Liquid State, 1331–1340
Oxovanadium(IV)
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Oxygen
Reaction of the Triplet State of Retinol with Oxygen, 1–7
Temperature Dependence of the Rate Constants for the Quenching by Nitric Oxide of the Two Excited Singlet States of Molecular Oxygen = $O_2(a\ ^1\Delta_g)$ and $O_2(b\ ^1\Delta_g^+)$, 907–917
Preparation, Spectroscopy and Reaction with Oxygen of $CO(en)_2^{2+}$ on the Surface of Hectorite, 1169–1180
Palladium
Inelastic Neutron Scattering Study of Hydrogen Adsorbed on Impure Palladium Black, 253–262
Pentacene
Radiationless Transitions in *p*-Terphenyl Crystals Doped with Anthracene, Tetracene and Pentacene, 263–269
Permeation Kinetics
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 2.—Permeation Kinetics, 585–597
Perovskite
Reduced Forms of $LaNiO_3$ Perovskite. Part 1.—Evidence for New Phases: $La_2Ni_2O_5$ and $LaNiO_2$, 1181–1194
Reduced Forms of $LaNiO_3$ Perovskite. Part 2.—X-ray Structure of $LaNiO_2$ and Extended X-ray Absorption Fine Structure Study: Local Environment of Monovalent Nickel, 1195–1203
Phase Diagram
Phase Equilibria in Binary Mixtures. Part 2.—Miscibility Gap with Two Critical Temperatures (Closed-loop Phase Diagram), 57–64
Phase Equilibria
Phase Equilibria in Binary Mixtures. Part 1.—Miscibility Gap with Upper or Lower Critical Point, 41–55
Phase Equilibria in Binary Mixtures. Part 2.—Miscibility Gap with Two Critical Temperatures (Closed-loop Phase Diagram), 57–64
Phospholipid Bilayer Systems
Image-charge Forces in Phospholipid Bilayer Systems, 19–35
Phosphorus Oxyfluoride
Energetics of the Ionization and Fragmentation of Phosphorus Oxyfluoride Studied by Electron-impact Spectroscopy, 1341–1346
Photochemistry
Photochemistry and Sensitized Evolution of Hydrogen from Water Using Water-soluble Cationic Porphyrins. Tetrakis(trimethylaminophenyl)-porphyrinatozinc and its Free Base, 1365–1374
Photoelectron Spectra
Electronic Structure and Low-energy Photoelectron Spectra of 4,4′-Disubstituted 2,2′-Bipyridines, 295–301
Absorption Spectra of Substituted Biphenyl and Related Cations in Solid Argon and a Comparison with Photoelectron Spectra, 885–895
Study of the Ionization Process $BF^+(X^2\Sigma^+)$ $BF(X^1\Sigma^+)$ by High-temperature Photoelectron Spectroscopy, 483–490
A Study of the First Ionization Potential of the $CrO(X\ ^5\Pi)$ Molecule with High-temperature Photoelectron Spectroscopy, 1083–1088
Photofragmentation
Photofragmentation of CH_3I, CD_3I and CF_3I. Formation of $I(^2P_{1/2})$ as Function of Wavelength, 303–316
Photophysics
Photophysics of Derivatives of all-*trans*-1,6-Diphenyl-1,3,5-hexatriene (DPH) Part 1.—Model Involving Fluorescence from S_2 and S_1 Excited States, 433–447
Photophysics of 1-Aminonaphthalenes, 1563–1584

Photoreduction
Photoreduction of Benzo-1,4-quinone Sensitized by Metalloporphyrins, 807–816
Phthalocyanine
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Platinum
Excitation Wavenumber Dependence of the Symmetric Chain-stretching Mode of Linear-chain Mixed-valence Platinum Complexes, 519–527
Point-group Symmetries
Point-group Symmetries on the Spherical Shell. New Perspectives in the Generation of Symmetry-adapted LCAO Functions, 1791–1809
Poisson–Boltzmann Equation
An Improved Modified Poisson–Boltzmann Equation in Electric-double-layer Theory, 707–718
Poisson–Boltzmann Theory
Comments on the Modified Poisson–Boltzmann Theory for the Electric Double Layer, 1315–1317
Polar Molecules
Geometries of Van der Waals Complexes of Small Polar Molecules, 1455–1464
Polar Properties
Infrared Intensities and the Polar Properties of Bonds, 745–754
Polar Solvent
Non-local Dielectric Response of a Polar Solvent and Debye Screening in Ionic Solution, 651–661
Polarizability
Intramolecular $NH\cdots N^- \rightleftharpoons {}^-N\cdots HN$ Hydrogen Bonds with Large Proton Polarizability in Monosalts of Diamines, 1249–1255
Polarization
Spatially Varying Polarization in Ice, 211–223
Spatially Varying Polarization in Ice. A Model for the Electric Double Layer and the Hydration Force, 225–242
Polyatomic Gases
Second-order Approximations for the Transport Properties of Dilute Polyatomic Gases, 1425–1441
Polymorphism
Polymorphism in $(n\text{-}C_7H_{15}NH_3)_2MnCl_4$ and $(n\text{-}C_7H_{15}NH_3)_2CdCl_4$ as determined by Heat-capacity Measurements from 10 to 325 K, 1653–1661
Polystyrene
Memory Effects in Collisional Polarizations in Polystyrene, Xylene and Polystyrene Toluene Solutions, 687–693
Poly(*N*-vinylpyrrolidone)
Ultrasonic Relaxation of Poly(*N*-vinylpyrrolidone) and Dextran in Aqueous Solution, 977–988
Porphyrazine
Optical and Electron Spin Resonance Studies of Copper(II), Nickel(II) and Oxovanadium(IV) Complexes of Water-soluble Phthalocyanine and Porphyrazine Chelates Absorbed on Sephadex Resin, and the Effect of Added Dithionite, 1123–1141
Porphyrins
Photochemistry and Sensitized Evolution of Hydrogen from Water Using Water-soluble Cationic Porphyrins. Tetrakis(trimethylaminophenyl)-porphyrinatozinc and its Free Base, 1365–1374
Potassium Bromide
X-ray Diffraction Analysis of Molten Potassium Bromide, 463–471
Potassium Silicate Solutions
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 5.—First-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1525–1538
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 6.—Second-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1539–1561
Proteins
Electron Transfer in Proteins, 1375–1388
Proton Correlation Spectral Decay Curves
Analysis of Proton Correlation Spectral Decay Curves by the *S*-exponential Sum Method, 989–1009
Prototropic Charge Migration
Prototropic Charge Migration in Water. Part 1.—Rate Constants in Light and Heavy Water and in Salt Solution from Oxygen-17 Spin Relaxation, 1031–1046
Prototropic Charge Migration in Water. Part 2.—Interpretation of Nuclear Magnetic Resonance and Conductivity Data in Terms of Model Mechanisms, 1047–1073
Quadrupole Moment
Molecular Quadrupole Moment and Effective-quadrupole-Centre of Fluorobenzene, 529–538
Quadrupole Resonance
Positive Temperature Coefficient of the Iodine Quadrupole Resonance Frequency in Ammonium Tri-iodide due to Reorientation of the Ammonium Ion, 497–504
Quantum-mechanical Study
An Improved Quantum-mechanical Study of Environmental Effects on the Spectral Shift of the Rhodopsin System, 1759–1770
Quenching
Temperature Dependence of the Rate

Quenching (*cont.*)
Constants for the Quenching by Nitric Oxide of the Two Excited Singlet States of Molecular Oxygen = $O_2(a\ ^1\Delta_g)$ and $O_2(b\ ^1\Delta_g^+)$, 907–917
Collisional Quenching of $Mg(3\ ^3P_J)$ Studied by Time-resolved Emission, $3\ ^3P_1 \rightarrow 3\ ^1S_0 + h\nu$ ($\lambda = 457.1$ nm), followed by Dye-laser Excitation, 919–930
Racemic Mixtures
Enantiomers and Racemic Mixtures. The Correlation between Rotation and Translation, 1811–1815
Radiationless Transitions
Radiationless Transitions in *p*-Terphenyl Crystals Doped with Anthracene, Tetracene and Pentacene, 263–269
Radical-ion Pairs
Ion-cluster Formation and its Effect on the Electronic Spectrum of Radical-ion Pairs, 1233–1241
Raman Amplification Spectroscopy
Raman Amplification Spectroscopy Using Mode-locked Lasers, 865–883
Raman Spectrum
Spectroscopy at High Pressures. Part 42.—The Raman Spectrum of Mercury(II) Thiocyanate, 695–705
Rare-gas Solids
Mössbauer Studies of FeSn Molecules Isolated in Rare-gas Solids and SCF–Xα–Scattered-wave Molecular-orbital Analyses of Sn_2 and FeSn Diatomic Molecules, 271–282
Rate Constants
Elementary Reactions of the NCl Radical. Part 1.—Rate Constants for the Reactions $NCl + NCl \rightleftharpoons N_2 + 2Cl$ and $O + NCl \rightleftharpoons NO + Cl$, 283–293
Temperature Dependence of the Rate Constants for the Quenching by Nitric Oxide of the Two Excited Singlet States of Molecular Oxygen = $O_2(a\ ^1\Delta_g)$ and $O_2(b\ ^1\Delta_g^+)$, 907–917
Rayleigh–Brillouin Spectroscopy
Rayleigh–Brillouin Spectroscopy of n-Tetracosane. Are There Transitions in the Melt?, 677–685
Relaxation
Intramolecular Relaxation Processes of Benzophenone and Related Molecules in Glassy Media, 559–570
Phenomenological Treatment of Chemical Relaxation Data, 645–650
Dielectric Study of Relaxation in Anionic Alkylammonium Carboxylate Surfactants and Related Non-ionic Molecules, 1217–1231
^{14}N Nuclear Quadrupole Resonance and Relaxation in Tetramethylpyrazine, 1771–1777
Retinol
Reaction of the Triplet State of Retinol with Oxygen, 1–7
Rhenium
X-Ray Photoelectron Spectroscopic Studies of Unsupported and Supported Rhenium using Argon-ion Bombardment, 1719–1728
Rhodopsin
An Improved Quantum-mechanical Study of Environmental Effects on the Spectral Shift of the Rhodopsin System, 1759–1770
Rotational Barrier
A Bond-orbital Analysis of the Rotational Barrier in Borazane and its Comparison with Ethane, 931–939
Improved Bond-orbital Calculations of Rotational Barriers in Molecules Containing Lone Pairs of Electrons, 1283–1298
Rotational Isomerism
Ultrasonic Studies of Rotational Isomerism in Various Methylhexanes, 731–743
Rotational Spectrum
Rotational Spectrum of Trifluoriodomethane, 941–949
Ruthenium
Excited States of Mixed-ligand Chelate Complexes of Ruthenium (II). A Re-examination of the Evidence for Strong Interligand Coupling, 195–210
Second-order Approximations
Second-order Approximations for the Transport Properties of Dilute Polyatomic Gases, 1425–1441
Selenophen
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane, 539–545
Self-diffusion
Self-diffusion and Shear Viscosity of Simple Fluids. A Molecular-dynamics Study, 1741–1758
Serotonine
Proton and Carbon-13 Nuclear Magnetic Resonance Spectra and INDO Study of Serotonine, Tryptamine and L-Tryptophan, 491–496
Shape-selective Zeolitic Catalysts
Evidence for Semi-regularly Ordered Sequences of Mirror and Inversion Planes in ZSM-5/ZSM-11 Shape-selective Zeolitic Catalysts, 1075–1082
Shear Viscosity
Self-diffusion and Shear Viscosity of Simple Fluids. A Molecular-dynamics Study, 1741–1758
Silicate
Luminescence of Eu^{3+} and Tb^{3+} Ions Adsorbed on Hydrated Layer-lattice Silicate Surfaces, 505–518
Silicate Solutions
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 5.—First-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1525–1538

Silicate Solutions (*cont.*)
Silicon-29 Nuclear Magnetic Resonance Studies of Aqueous Silicate Solutions. Part 6.—Second-order Patterns in Potassium Silicate Solutions Enriched with Silicon-29, 1539–1561
Simple Fluids
Self-diffusion and Shear Viscosity of Simple Fluids. A Molecular-dynamics Study, 1741–1758
Single Crystals
Low-Temperature Absorption Spectrum of the Nickel(II) Ion in Single Crystals of the Columbite $NiNb_2O_6$, 847–863
Small-amplitude Periodic Parameter Variation
Effect of Small-amplitude Periodic Parameter Variation in Thermokinetic Systems, 1729–1740
Small-angle Scattering
Small-angle Scattering from Colloidal Dispersions, 817–832
Small-angle X-ray Scattering
One-dimensional Mathematical Treatment of Small-angle X-ray Scattering from a System of Alternating Lamellar Phases, 1593–1605
Sn_2
Mössbauer Studies of FeSn Molecules Isolated in Rare-gas Solids and SCF–Xα–Scattered-wave Molecular-orbital Analyses of Sn_2 and FeSn Diatomic Molecules, 271–282
Sodium Thiocyanate
Viscoelastic Relaxation in the Acetamide + Sodium Thiocyanate Binary System, 1257–1263
Solute–Solvent Exciplex
Solute–Solvent Exciplex *versus* Twisted Intramolecular Charge-transfer State in Anomalous Fluorescence of 4-*nn*-Dimethylaminobenzonitrile, 347–367
Sorption Kinetics
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 1.—Sorption Kinetics, 571–584
Spherical Interface
Mechanical Model for a Spherical Interface with Low Tension, 185–193
Spin
Charge and Spin Locations in Linear Stacks of TCNQ, 243–251
Spin Diffusion
Effect of Methyl-group Reorientation and Spin Diffusion on Spin–Lattice Relaxation in Some Choline and Acetylcholine Halides, 1107–1112
Spin Exchange
Electron Spin Resonance Study of Spin Exchange in a Nematic Solvent, 1243–1247
Spin Relaxation
Prototropic Charge Migration in Water. Part 1.—Rate Constants in Light and Heavy Water and in Salt Solution from Oxygen-17 Spin Relaxation, 1031–1046
Spin–Lattice Relaxation
Effect of Methyl-group Reorientation and Spin Diffusion on Spin–Lattice Relaxation in Some Choline and Acetylcholine Halides, 1107–1112
^{13}C Nuclear Magnetic Resonance Spin–Lattice Relaxation Times and Conformation of 2-Chlorodibenzo-*p*-dioxine, 1633–1638
Surfactants
Dielectric Study of Relaxation in Anionic Alkylammonium Carboxylate Surfactants and Related Non-ionic Molecules, 1217–1231
Surface Temperature Gradients
Surface Temperature Gradients and Rates of Internal Heat Evolution at Criticality for Generalized Heat Transfer (Arbitrary Biot Number), 1629–1631
Surface Tension
The Surface Tension of a Drop of Liquid, 1689–1698
Tb^{3+}
Luminescence of Eu^{3+} and Tb^{3+} Ions Adsorbed on Hydrated Layer-lattice Silicate Surfaces, 505–518
TCNQ
Charge and Spin Locations in Linear Stacks of TCNQ, 243–251
***p*-Terphenyl**
Radiationless Transitions in *p*-Terphenyl Crystals Doped with Anthracene, Tetracene and Pentacene, 263–269
Tetracene
Radiationless Transitions in *p*-Terphenyl Crystals Doped with Anthracene, Tetracene and Pentacene, 263–269
Tetrachloroferrocene
Structure and Dynamics in the Three Crystal Phases of 1,1′,2,2′-Tetrachloroferrocene, 1663–1675
n-Tetracosane
Rayleigh–Brillouin Spectroscopy of n-Tetracosane. Are There Transitions in the Melt?, 677–685
Tetramethylpyrazine
^{14}N Nuclear Quadrupole Resonance and Relaxation in Tetramethylpyrazine, 1771–1777
Tetramethylsilane
Molecular Reorientation of Benzene in Carbon Tetrachloride, Tetramethylsilane and Neopentane Solutions, 1143–1153
Thermal Conductivity
Thermal Explosions, Criticality and Transition in Systems with Variable Thermal Conductivity. Distributed Temperatures., 1499–1513
Thermal Explosions
Thermal Explosions, Criticality and Transition

Thermal Explosions (*cont.*)
in Systems with Variable Heat-transfer Coefficient. Uniform Temperatures (Semenov Case), 1481–1498
Thermal Explosions, Criticality and Transition in Systems with Variable Thermal Conductivity. Distributed Temperatures., 1499–1513
Thermodynamics
The Thermodynamics of a Liquid Lens, 77–90
Thermodynamics of Liquid Mixtures of Nitrous Oxide and Ethane, 1399–1415
Thermokinetic Systems
Effect of Small-amplitude Periodic Parameter Variation in Thermokinetic Systems, 1729–1740
Thiophen
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane, 539–545
Time-resolved Emission
Collisional Quenching of $Mg(3\,^3P_J)$ Studied by Time-resolved Emission, $3\,^3P_1 \rightarrow 3\,^1S_0 + h\nu$ ($\lambda = 457.1$ nm), followed by Dye-laser Excitation, 919–930
Toluene
Memory Effects in Collisional Polarizations in Polystyrene, Xylene and Polystyrene Toluene Solutions, 687–693
Transition-metal Fluoride
d-Orbital-directed X-ray Photoemission from Some Transition-metal Fluoride Single Crystals and Associated Calculations. K_2FeF_5, 1321–1329
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. MnF_2 and $KMnF_2$, 785–798
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. $KMnF_3$, 799–806
Transition-metal Hydridocarbonyls
Incoherent Inelastic Neutron Scattering Studies of Transition-metal Hydridocarbonyls. Part 1.—$Cs^+[HCO_6(CO)_{15}]^-$, 1713–1717
Transport Properties
Second-order Approximations for the Transport Properties of Dilute Polyatomic Gases, 1425–1441
Triethylammonium Salts
Infrared Spectroscopic Studies of Hydrogen Bonding in Triethylammonium Salts. Part 2.—Association of Triethylammonium Salts with Bases, 951–960
Trifluoriodomethane
Rotational Spectrum of Trifluoriodomethane, 941–949
1,3,5-Trimethylbenzene
Evaluation of ^1H Nuclear Magnetic Resonance Spin–Lattice Relaxation Times Facilitated
1,3,5-Trimethylbenzene (*cont.*)
by Analogous ^{13}C Studies, Illustrated by Studies of 1,3,5-Trimethylbenzene, 1021–1029
Triplet State
Reaction of the Triplet State of Retinol with Oxygen, 1–7
Tryptamine
Proton and Carbon-13 Nuclear Magnetic Resonance Spectra and INDO Study of Serotonine, Tryptamine and L-Tryptophan, 491–496
L-Tryptophan
Proton and Carbon-13 Nuclear Magnetic Resonance Spectra and INDO Study of Serotonine, Tryptamine and L-Tryptophan, 491–496
Ultrasonic Relaxation
Ultrasonic Relaxation of Poly(*N*-vinylpyrrolidone) and Dextran in Aqueous Solution, 977–988
Ultrasonic Studies
Ultrasonic Studies of *N*-Formylmorpholine + Water Mixtures, 449–461
Ultrasonic Studies of Rotational Isomerism in Various Methylhexanes, 731–743
Uniform-temperature Systems
Thermal Explosion, Times to Ignition and Near-critical Behaviour in Uniform-temperature Systems. Part 2.—Generalized Dependences of Rates on Temperature and Concentration, 1299–1313
Unsaturated Compounds
Dielectric Dispersion Studies of Some Unsaturated Compounds in Dilute Solutions, 9–17
Vacuum-ultraviolet Photodissociation
NO Fluorescence During Vacuum-ultraviolet Photodissociation of $CFCl_2NO$, 1355–1363
Van der Waals Complexes
Geometries of Van der Waals Complexes of Small Polar Molecules, 1455–1464
Viscoelastic Relaxation
Viscoelastic Relaxation in the Acetamide + Sodium Thiocyanate Binary System, 1257–1263
Viscoelastic Shear
Viscoelastic Shear Thinning of Liquids. A Molecular-dynamics Study, 611–635
Viscosity Measurements
Dynamics of the Degradation of Tritium-substituted Deoxyribonucleic Acid in Aqueous Solution from Dielectric Relaxation and Viscosity Measurements, 897–905
Water
Prototropic Charge Migration in Water. Part 1.—Rate Constants in Light and Heavy Water and in Salt Solution from Oxygen-17 Spin Relaxation, 1031–1046
Prototropic Charge Migration in Water. Part 2.—Interpretation of Nuclear Magnetic

Water (*cont.*)
Resonance and Conductivity Data in Terms of Model Mechanisms, 1047–1073
Computer Simulation of Water in contact with a Rigid-ion Crystal Surface, 1639–1651
Xα Calculations
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. MnF_2 and $KMnF_2$, 785–798
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. $KMnF_3$, 799–806
X-Ray Diffraction
X-ray Diffraction Analysis of Molten Potassium Bromide, 463–471
X-Ray Diffraction Study of Aqueous Zinc(II)(2,2′,2″-triaminotriethylamine) Chloride, 1817–1823
X-Ray Photoelectron Spectroscopic Studies
X-Ray Photoelectron Spectroscopic Studies of Unsupported and Supported Rhenium using Argon-ion Bombardment, 1719–1728
X-Ray Photoemission
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. MnF_2 and $KMnF_2$, 785–798
d-Orbital Directed X-ray Photoemission from some Transition-metal Fluoride Single Crystals and Associated Xα Calculations. $KMnF_3$, 799–806
d-Orbital-directed X-ray Photoemission from Some Transition-metal Fluoride Single Crystals and Associated Calculations. K_2FeF_5, 1321–1329
X-Ray Structure
Reduced Forms of $LaNiO_3$ Perovskite. Part 2.—X-ray Structure of $LaNiO_2$ and Extended X-ray Absorption Fine Structure Study: Local Environment of Monovalent Nickel, 1195–1203
Xylene
Memory Effects in Collisional Polarizations in Polystyrene, Xylene and Polystyrene Toluene Solutions, 687–693
Zinc Oxide
Optical Properties of Microcrystalline Zinc Oxide. Influence of Defects Produced by Interaction with CO, 1779–1789
Zinc(II)(2,2′,2″-triaminotriethylamine) Chloride
X-Ray Diffraction Study of Aqueous Zinc(II)(2,2′,2″-triaminotriethylamine) Chloride, 1817–1823
